Mediterranean

Extra Virgin Olive oil

The first cultivation of the olive tree worldwide took place in Greece, and more specific in Crete. After 2000 BC the cultivation of the olive tree in Crete was very intense and systematic playing the most important role on the island's economy. The first export of the olive oil not only in mainland Greece but in Northern Africa and Asia as well, started from Crete. Very soon the cultivation passed to mainland Greece and the olive tree and its blessed product, olive oil became synonyms of the Greek nutrition through centuries.

The olive tree was a symbol in ancient Greece and the olive oil was used not only for its valuable nutritional quality but also for medical purposes.

Greece is the world's most important exporter of qualitative Extra Virgin olive oil. The love and high esteem of the Greek olive-grower for the olive tree is passed on from generation to generation and from family to family. The blessed tree grows up with the family, only it will have a much longer life and will still be around to be tended by the next generation, and the one after that.

Our OPHELLIA Extra Virgin Olive Oil stands out for its intense aroma, olive fruit flavor, it's gold green color, mild and a little spicy taste at the end.

Try our OPHELLIA Extra Virgin Olive Oil and let it fascinate you.

Mediterranean Balsamic

If your salad is simply fresh...

If your roast is just tasteful...

If your dinner is all done...

But you feel like something is missing...

Every time that you need an extra touch in your creations, just add some drops of OPHELLIA Balsamic and OPHELLIA Balsamic Crème.

Made from grapes, balsamic vinegar is known for its rich flavor and velvety black color.

It is fermented in wooden barrels, much like wine, and the taste of balsamic vinegar intensifies the longer it is aged.

The thicker and more intense the flavor becomes, the less you need to use to provide a taste boost. Balsamic vinegar offers a number of health benefits, though the serving size is small.

Balsamic can reduce cholesterol level, its antioxidants may slow the aging process, it may reduce the frequency of headaches, help prevent anemia and fatigue, can help suppress appetite and therefore an aid in controlling weight.

Add savor in taste...
